

EUSTACE FUMNANYA MBANEFO

Frontend Developer

Lagos, Nigeria | +234 810 171 0392 | [Email](#) | [Github](#) | [Linkedin](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Developer experienced in building responsive, data-driven web applications using React, Next.js, TypeScript and Tailwind CSS. Experienced in developing production dashboards, API-driven platforms, e-commerce applications and business websites, with additional backend experience using Python, Flask and PostgreSQL. Strong focus on component-driven development, state management, API integration, responsive UI, performance and user experience.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS

State & Data Management: Zustand, TanStack Query (React Query), Context API, TanStack Table

UI & Data Visualization: Chakra UI, React Bootstrap, Recharts, AOS (Animate On Scroll)

Backend & Database: Python, Flask, SQLAlchemy, PostgreSQL, REST APIs

Tools & Deployment: Git, GitHub, Linux (Ubuntu/Debian), Bash, Vercel, Render

WORK EXPERIENCE

Solarscript Tech — Founder & Frontend Developer

October 2023 – Present | Lagos, Nigeria

[Solarscript](#)

- Designed, built and deployed the company's responsive website using Next.js, managing the application's frontend architecture and content.
- Maintain and update the website, including project galleries, layouts, service information and other business content. .
- Manage website hosting and troubleshoot deployment, performance and other technical issues to keep the site operational.
- Implement frontend design and layout improvements to maintain a modern, responsive user experience across devices.
- Create promotional graphics and social media materials using Canva and AI-assisted design tools to support the company's digital marketing efforts.

Flexisaf Edusoft Limited — Frontend Developer Intern

May 2025 – September 2025 | Abuja, Nigeria

Participated in a structured software engineering internship involving weekly development assignments, technical learning sessions and collaborative projects, culminating in a final full-stack application.

Production Scheduler

- Developed a full-stack production scheduling application using Next.js, TypeScript, Python/Flask and PostgreSQL, with the frontend deployed on Vercel and backend services deployed on Render.
- Built a data-intensive dashboard using Next.js and TypeScript, implementing reusable interfaces for viewing and managing production information.
- Implemented advanced data tables with TanStack Table, including filtering, multi-column sorting and pagination for production datasets.
- Integrated Recharts to transform production data into interactive charts and performance visualizations.
- Connected the Next.js frontend to Flask/Gunicorn REST APIs using the Fetch API, implementing asynchronous request handling and frontend error states.
- Built responsive interfaces with Tailwind CSS to provide a consistent experience across desktop and mobile devices.

Hanover health - communicable disease tracker

- Built a full-stack health-tracking application using React and Flask to visualize communicable disease trends across Uganda, Kenya and the Democratic Republic of Congo.
- Developed a Flask middleware layer to retrieve and process epidemiological data from the WHO API before delivering it to the frontend.
- Implemented TanStack Query for server-state management, caching and stale-time configuration to reduce unnecessary API requests.
- Built data-driven interfaces using responsive layouts, interactive bar charts and specialized tables to present epidemiological datasets.
- Implemented dynamic routing to create reusable pages for different data views and improve application navigation.

SELECTED PROJECTS

Minify - E-commerce application

Personal Project

- Built a dynamic e-commerce application with React and Next.js, using dynamic routes to render individual product pages from reusable templates.
- Implemented a persistent shopping cart with Zustand and local-storage middleware, allowing cart data to remain available across browser sessions.
- Developed responsive navigation with real-time cart indicators and interactive product-rating components.
- Structured the application around reusable components and dynamic routing to reduce duplicated page logic.

Media Compressor — Video & Audio Compression Tool

Personal Project | [In Progress](#)

- Building a browser-based media compression application using React, Next.js, TypeScript and FFmpeg.wasm for client-side media processing.
- Designed and implemented the complete compression interface, including media upload, video settings, compression controls, progress states and output handling.
- Implemented FFmpeg.wasm video-processing and compression logic, including configurable video compression options and media transformation workflows.
- Currently extending the application with audio compression functionality and completing the processed-file download workflow.

EDUCATION

Alex Ekwueme Federal University, Ikwo, Nigeria

B.Sc. Criminology

October 2018 - June 2023

TRAINING & CERTIFICATION

ALX Africa

Software Engineering Programme

August 2022 - January 2024

- Trained and worked collaboratively on software engineering projects using Linux kernel, Git and GitHub, including version control, branching, code collaboration and project development workflows.
